

How to Draw a Turkey

1. Start with a few simple lines to make the top of the tail, the wings, the head and neck.

2. Add Beak, Eye(s), Legs and a few more details on the wings and tail.

3. Add curved lines for feathers, more details for legs and Eye(s).

4. Color as you like.

5. Add some Fall Leaves. Make a small hole with a pen or pencil slide the stem of the leaf through and tape stem on backside to hold in place. The kids can draw leaves for their pictures as an alternative.

6. Finish with a Happy Thanksgiving Greeting!

The leaves don't last very long, but it helps give the kids a real feel for Fall.
